VISIT SUMMARY

You mentioned experiencing a headache, but we didn't discuss the specifics of your headache in detail. Headaches can have various causes, including stress, dehydration, or underlying medical conditions. It's essential to consider these possibilities when evaluating your symptoms. For now, consider practicing self-care, staying hydrated by drinking plenty of water, and getting adequate rest.

CARE PLAN / PRESCRIPTION SECTION (DRAFT)

Not a formal prescription — educational draft only.

If your symptoms persist, you may want to ask a pharmacist or clinician about over-the-counter pain relievers, such as acetaminophen or ibuprofen, but always follow their advice and the recommended dosage on the label. For any prescription medication, please consult a licensed clinician who can assess your condition and provide a proper prescription if necessary.

IMPORTANT DISCLAIMERS

This conversation is for educational purposes only and not a substitute for in-person medical care. I encourage you to consult with a healthcare professional for a thorough evaluation and personalized advice. Please take care of yourself and don't hesitate to reach out to a clinician if your symptoms persist or worsen.
